SUMMARY

Full Stack Engineer with **3+ years** of experience building end-to-end products across **React/Next.js** micro-frontend platforms and **Java/Node.js** backend services. Skilled in system design, BFF architecture, event-driven systems (Kafka), and AWS cloud infrastructure. Proven track record owning full feature lifecycles, from UI to API to database, serving **30,000+ daily active users** and sustaining a peak of **3,400 RPS** in production.

SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, Java, SQL, HTML5, CSS3
- **Frontend:** React.js, Next.js, Redux, Micro-Frontend Architecture, Design Systems, WebView/JS-Bridge Integration
- **Backend:** Node.js, Express.js, Spring Boot, RESTful APIs, BFF Architecture, Kafka
- **Databases & Caching:** MySQL, MongoDB, Redis, Elasticsearch
- **DevOps & Cloud Infrastructure:** AWS, Docker, Jenkins, CI/CD, ArgoCD
- **Testing:** Jest, JUnit, Selenium, RestAssured, Postman
- **Monitoring & Telemetry:** Grafana, Kibana, Application Performance Monitoring (APM)
- **AI Tools:** Cursor, GitHub Copilot, CodeRabbit, Claude

WORK EXPERIENCE

Meesho **June 2025 - Present**
Software Development Engineer - I (SDE-1) Bengaluru, India

- **Owned** end-to-end architecture for the Supplier Panel – a **React/TypeScript** micro-frontend ecosystem serving **30,000+ daily active users** – paired with a **Node.js/Express BFF layer** sustaining a mean of **1,200 RPS** (peak **3,400 RPS**), with Grafana telemetry and Docker/CI-CD deployment.
- **Shipped** the "Home Pricing Widget" full-stack for EID suppliers, combining frontend UI with backend pricing-aggregation logic; drove a **7% retention increase**, an **NPS of 8**, and a **12% lift** in new EID onboarding.
- **Engineered** the LLM-based Fetch Product Attribute Service (**Java, Spring Boot, MySQL, Redis**), scaling from a fixed-category model to a generalized pipeline supporting **1,100+** additional categories at up to **450 RPS**.
- **Migrated** Role-Based to Policy-Based Access Control across both frontend and backend layers of Supplier Panel and Demand services, and consolidated Demand-side webviews into a single centralized JS-Bridge package.
- **Co-architected** GST-portal registration automation (Selenium) that cut EID drop-off by **34%**; mentored SDE-1s and owned on-call as service owner of Supplier Platform Growth.

Paytm **June 2023 - June 2025**
Software Engineer Noida, India

- **Rebuilt** the Golden Gate agent application frontend (React, polygon-based map UI) while owning the backend **Ticket Management System (TMS)** batching pipeline (Java, Spring Boot, Kafka) processing **10–12 lakh (1M–1.2M) tickets daily**.
- **Delivered** client-facing TMS APIs (dynamic form layouts, bulk CSV/Excel ingestion) and the **Zone Management** system (SQL + Elasticsearch), serving **30,000 DAU** across **3 lakh+** zones.
- **Built** the FSE Performance Module on the hybrid mobile frontend and automated the **Exit Management** backend pipeline (Selenium + HRMS integration), handling **15–35 RPS**.
- **Accelerated** application performance by **20%** and reduced downtime by **10%** through React refactoring; standardized Jest and RestAssured testing across CI/CD pipelines.

PROJECTS

- **Web Views JS Bridge Package** (*TypeScript, Rollup, Pub/Sub Protocol, Jest*)
 - **Designed** a cross-organizational, plug-and-play package with an asynchronous pub/sub IPC bridge across **15+** native container endpoints, cutting inter-process latency by **30%** and achieving **92% test coverage**.
- **Dare2Dev Web Portal** (*React, Node.js, Express, MongoDB, WebSockets, JWT*)
 - **Built** an end-to-end hackathon platform – React frontend with a RESTful/WebSocket Node.js backend – supporting **500+** active users, with JWT authentication, real-time leaderboards, and a judge grading portal.

EDUCATION

Inderprastha Engineering College **2019 - 2023**
Bachelor of Technology (B.Tech) - Honors in Computer Science

ACHIEVEMENTS

- **Rockstar Performer** (Paytm): Awarded Best Performer of the Quarter for contributions across frontend performance and backend infrastructure.
- **Google Developer Student Club Lead:** Founded and led the student developer chapter at IPEC for 2 years, conducting full-stack technical workshops and hackathons.
- **Certification:** Microsoft Technical Associate (MTA) in JavaScript.
